25X1A

MEMORANDUM FOR: Chief, Procurement Division, OL

ATTENTION : Contract Administration and Settlement Branch, PD

THROUGH : Chief, Support Staff, NPIC

25X1A

SUBJECT : [REDACTED]

REFERENCE : NPIC/TDS/[REDACTED] Memorandum Dated 16 October 1967

25X1A

1. The subject contract with [REDACTED] is for the design, fabrication, and delivery of four Fibre-Optic Stereoviewers Model 552A. The last viewer (552A-104) was accepted in the reference as of 16 October 1967; however, the contract specifies a 90-day warranty period associated with the equipment.

25X1A

2. On 8 December 1967, it was discovered that certain deficiencies exist in the objective transport system which should be covered within this warranty. Specifically, when the transport is in the coupled mode, at the highest zoom setting, the ratio of the Y axis to X axis objective speed is approximately 3.5:1 when it should be 1:1.

3. It is recommended that [REDACTED] be formally informed of this deficiency and requested to correct it. They were verbally informed of this problem on 11 December 1967 and agreed to investigate the matter.
